Date: April 2, 2010

PSA, Thirty (30) Seconds

Begins: 04/02/10

Ends: 04/30/10

Get Yourself Tested for STDs!

STDs are a major public health issue in the United States. According to the CDC, there are about 19 million new cases of STDs in the U.S. each year – almost half of those are among people ages 15 to 24.

The good news is that STDs are preventable and treatable, but the bad news is that many people who are infected don't know it.

GET YOURSELF TESTED FOR STDs!

Talk to your private healthcare provider about STDs or contact your local public health department.

This message is from the North Georgia Health District, part of the Georgia Department of Community Health.
